

## Using Adobe Connect with Google Chrome browser

The Google Chrome browser blocks the Adobe Add-on from launching by default. However, for users who wish to use Chrome to launch their Adobe Connect meetings they will need to do the following:

Install the Adobe Add-in from this site:

<https://connect.niunt.niu.edu/common/help/en/support/startmain.htm>

In Chrome you will need to add a plugin exception

`chrome://settings/content`

Goto "Unsandboxed plugin access"

Click "Manage exceptions..."

Add <https://connect.niunt.niu.edu> and set the Behavior to Allow.

Here is a shortcut link to get to the exceptions window:

`chrome://settings/contentExceptions#ppapi-broker`

Once you complete these two setups your Adobe Connect meetings should launch in the Adobe Add-in.

Here are the official Adobe instructions if you continue to have problems
